

OHHS Modernization Update

CTE Building

The Career-Tech Building is not only taking shape, it is taking color as well. The exterior is being painted as weather permits, but the interior is changing daily. Upper right is a painted classroom, with some of the counters and cupboards installed. At right is the woodworking shop. Move in is planned for the week of spring break.

New Commons & Auditorium

The new face of the high school will be the new commons and auditorium. This two story building continues to expand from one end of the school to the other. Below is the foundation of the new administration and counseling center which will be on the first floor at the far east side of the new commons building. Move-in is set for August.

B-Wing

The utility corridor, under a sloped roof, is seen in the top photo. The walls of the various classrooms are going up (left). Move in should take place in Aug.
