

SAMPLE SLP WRITING DOCUMENT 2018

Teaching Textbooks Math 7

Box 1: Class Description

This year-long course covers the 7th grade math content noted below. Weekly certificated contact will be completed through direct personal contact with an HQ/certificated teacher in an on-site HC class. At least one state standard will be covered in this course.

Box 2: Learning Materials

The curriculum, books, supplies, materials, web-sites, and other sources used for this course are: Teaching Textbooks 7th Grade, paper, and pencil.

*Make additions or deletions as you see fit.

Box 3: Learning Goals/Performance Objectives

SEPTEMBER LESSONS 1 – 12

Chapter 1: Adding & Subtracting Whole Numbers 5

Lesson 1—Number Basics 6

Lesson 2—Writing Numbers 9

Lesson 3—Addition 12

Lesson 4—Carrying 15

Lesson 5—Adding Three or More Numbers 18

Lesson 6—Subtraction 21

Lesson 7—Regrouping 25

Lesson 8—Adding and Subtracting in Your Head 29

Chapter 1 Quiz 33

Chapter 2: Multiplying & Dividing Whole Numbers 37

Lesson 9—Over and Over 38

Lesson 10—Multiplying with Zeros 42

Lesson 11—Long Multiplication 45

Lesson 12—Multiplying with Two Digits 48

OCTOBER LESSONS 13-24

Lesson 13—Multiplying with Three Digits 51

Lesson 14—Multiplying in Your Head 54

Lesson 15—Division 57

Lesson 16—Dividing with Zeros 60

Lesson 17—Long Division 63

Lesson 18—Dividing with More Digits 67

Lesson 19—Divisibility Rules—Part 1 70

Lesson 20—Divisibility Rules—Part 2 73

Chapter 2 Quiz 77

Chapter 3: Whole Numbers in the Real World 81

Lesson 21—Eating Right 82

Lesson 22—Quilting 86

Lesson 23—Income Taxes 90

Lesson 24—Computer Hard Drives 94

NOVEMBER LESSONS 25-36

- Lesson 25—Buying a Car 98
- Lesson 26—Order of Operations 102
- Lesson 27—Using Parentheses and Fraction Bars 106
- Chapter 3 Quiz 110
- Chapter 4: Fractions 113
 - Lesson 28—Part of a Whole 114
 - Lesson 29—Larger Numerators 118
 - Lesson 30—Bigger on Top than Bottom 122
 - Lesson 31—Writing a Fraction in Two Ways 126
 - Lesson 32—Equivalent Fractions 130
- Chapter 4 Quiz 134
- Chapter 5: Reducing Fractions 137
 - Lesson 33—Making Fractions Simpler 138
 - Lesson 34—Greatest Common Factor 142
 - Lesson 35—Factoring and Canceling 146
 - Lesson 36—Prime Numbers 150

DECEMBER LESSONS 37-47

- Lesson 37—Ratios 154
- Lesson 38—Proportions 158
- Chapter 5 Quiz 163
- Chapter 6: Adding & Subtracting Fractions 167
 - Lesson 39—When the Bottoms are the Same 168
 - Lesson 40—Matching Up the Bottoms 172
 - Lesson 41—Changing Both Denominators 176
 - Lesson 42—Lowest Common Denominator 180
 - Lesson 43—Three or More 184
 - Lesson 44—Whole Numbers and Fractions 188
 - Lesson 45—Adding and Subtracting Mixed Numbers 192
 - Lesson 46—Converting from Mixed Number to Improper Fraction 196
 - Lesson 47—Converting from Improper Fraction to Mixed Number 200
- Chapter 6 Quiz

JANUARY LESSONS 48-60

- Chapter 7: Multiplying and Dividing Fractions 207
 - Lesson 48—Multiplying the Tops and Bottoms 208
 - Lesson 49—Fraction of a Whole Number 212
 - Lesson 50—Dividing with Fractions 216
 - Lesson 51—More Dividing with Fractions 220
- Chapter 7 Quiz 224
- Chapter 8: Fractions in the Real World 227
 - Lesson 52—Clearance Sale 228
 - Lesson 53—Ratios and Recipes 232
 - Lesson 54—Advertising 236
 - Lesson 55—Carpentry 241

Chapter 8 Quiz 246
Chapter 9: Decimals 249
Lesson 56—Expanded Notation 250
Lesson 57—Adding and Subtracting Decimals 255
Lesson 58—Working with More than One Decimal Digit 259
Lesson 59—Multiplying Decimals 264
Lesson 60—Multiplying and Dividing Decimals by 10, 100, 1,000... 268

FEBRUARY LESSONS 61-72

Lesson 61—Long Division with Decimals 272
Lesson 62—Decimal Remainders 276
Lesson 63—Converting Fractions to Decimals 280
Lesson 64—Converting Decimals to Fractions 284
Lesson 65—Never-Ending Decimals 287
Lesson 66—Rounding and Estimating 291
Chapter 9 Quiz 295
Chapter 10: Decimals in the Real World 299
Lesson 67—Checking Accounts 300
Lesson 68—Hours and Minutes 304
Lesson 69—Stock Prices 309
Lesson 70—Using a Calculator 314
Chapter 10 Quiz 319
Chapter 11: Percents 323
Lesson 71—The Concept of Percent 324
Lesson 72—Calculating Percents 328

MARCH LESSONS 73-84

Lesson 73—Percent of Any Number 332
Lesson 74—Percents with Fractions and Decimals 336
Lesson 75—What's the Percent? 340
Chapter 11 Quiz 344
Chapter 12: Percents in the Real World 347
Lesson 76—Sales Commissions 348
Lesson 77—Profit Margins 352
Lesson 78—A Trip to the Bank 356
Lesson 79—What's the Sales Tax Rate? 360
Chapter 12 Quiz 364
Chapter 13: Geometry Basics 367
Lesson 80—Lines, Line Segments, and Rays 368
Lesson 81—Angles 372
Lesson 82—Measuring Angles 377
Lesson 83—Angles in Pairs 382
Lesson 84—Triangles 388

APRIL LESSONS 85-96

Lesson 85—Quadrilaterals 393
Lesson 86—Congruent and Similar Figures 399
Chapter 13 Quiz 405
Chapter 14: Geometric Measurement 409
Lesson 87—Perimeter 410
Lesson 88—Area 416
Lesson 89—Area of a Parallelogram and Triangle 421
Lesson 90—Area in Pieces 426
Lesson 91—Circles 432
Lesson 92—Measuring Circles 438
Lesson 93—Solids and Volume 444
Chapter 14 Quiz 450
Chapter 15: Statistics & Probability 455
Lesson 94—Mean, Median, Mode, and Range 456
Lesson 95—Probability and Insurance 462
Lesson 96—Theoretical Probability 467

MAY LESSONS 97-107

Lesson 97—More than One Event 472
Lesson 98—Samples 476
Chapter 15 Quiz 481
Chapter 16: Graphing Concepts 485
Lesson 99—Circle Graphs, Bar Graphs, and Line Graphs 486
Lesson 100—Histograms 493
Lesson 101—Box and Whisker Plots 499
Lesson 102—The Number Line and Negative Numbers 505
Lesson 103—The Coordinate Plane 511
Chapter 16 Quiz 518
Chapter 17: Equations & Inequalities 523
Lesson 104—Equations 524
Lesson 105—Undoing Multiplication and Division 529
Lesson 106—Greater Than, Less Than 533
Lesson 107—Solving Inequalities 539
Chapter 17 Quiz 544

JUNE LESSONS Lessons 108-115

Lesson 108—Units of Measure 550
Lesson 109—Metric System 555
Lesson 110—Powers & Exponents 561
Lesson 111—Square Roots 565
Lesson 112—The Pythagorean Theorem 569
Lesson 113—Working with Negatives 574
Lesson 114—Subtracting Negatives 578
Lesson 115—Multiplying and Dividing Negatives 581
Additional Topics Quiz 586

Box 4: Learning Activities

Each day the student will complete a math lesson. They will have a new lesson/concept/learning explained, demonstrated/taught. They'll complete practice problems to ensure understanding of content. They will have independent practice/homework over those concepts. They will re-do and correct any problem which they missed. When review is needed, we'll not learn a new concept but take the time needed to re-teach or reinforce needed concepts.

*Make additions or deletions as you see fit.

Box 5 Progress Criteria/ Methods of Evaluation

Student monthly progress evaluation is made on the basis of weekly certificated contact, work samples, communications with students, communications with parents, and performance in on-site classes. It is electronically communicated to parents via WINGS. It is our goal that the student will accomplish approximately 10% of the goals of this course each month, September through June. The level of mastery expected is 70% or higher to progress. Methods of evaluation will include but are not limited to those below, under the direction of an HQ teacher:

- * observation and/or correction of daily and/or weekly work and progress
- * daily or weekly discussion of assignments, readings, writings
- * correction of work done incorrectly
- * portfolio kept of student work, at least weekly
- * standardized testing (iReady, state assessments, Iowa Tests, etc.)

*Make additions or deletions to the asterisk items as you see fit.

Box 6 Weekly Hours

Please estimate the number of hours your student will work on this course each week.
